---

## SUMMARY

Eager learner with a passion for **front-end web development**. Proficient in HTML, CSS, and JavaScript, with hands-on experience in designing and developing web pages.

---

## EDUCATION

**Sri Siddhartha Institute of Technology, Tumakuru, Karnataka**

*August 2020 - July 2024(Ongoing)*

Bachelor of Engineering in Computer Science

*CGPA: 7.42 (Ongoing)*

**Related Coursework:** Introduction to algorithms, Object-Oriented Programming, and Database Management Systems, Machine Learning Algorithms

---

## SKILLS

- **Programming Languages:** Python, SQL
- **Web Development:** HTML, CSS, JavaScript, Bootstrap.
- **Machine Learning Algorithms:** CNN, RNN, LSTM

---

## PROJECTS

1. **Image caption generator:**

   - Used deep learning techniques to translate visual content into human-like captions
   - Leveraged the power of Machine Learning and Deep Learning techniques like CNN, RNN and LSTM on existing datasets

2. **Emojify using facial recognition:**

   - Creating custom emojis based on CNN and Computer Vision Techniques including back propagation and image classification fields

3. **Personal portfolio:**

   - Designed and developed a personal portfolio website to showcase my work
